Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Claims 312-327 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 12.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11

Art Unit: 3653

F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 164-311 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 164-311 of copending Application No. 09/542,487. Although the conflicting claims are not identical, they are not patentably distinct from each other because the respective claims of the two applications are virtually identical except for the claims of the instant application being method claims and the claims of the '487 application being claims drawn to a device.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim 204 is provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 204 of copending Application No. 09/607,019. Although the conflicting claims are not identical, they are not patentably distinct from each other because the element "two or more output receptacles" of the '019 patent includes the element "exactly two output receptacles" of the instant application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Furthermore, the Examiner wishes to note that the files of applications 09/611,279 and 09/864,423, which are commonly owned by the Applicant, are currently unavailable to the Examiner for review of double patenting issues. These applications shall be reviewed once they are made available.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the following U.S. patents are considered relevant to the Applicant's disclosure because of the two distinct output receptacles:

Patent Number 3,759,382 by Walkley et al,

Patent Number 4,179,685 by O'Maley,

Patent Number 5,394,992 by Winkler, and

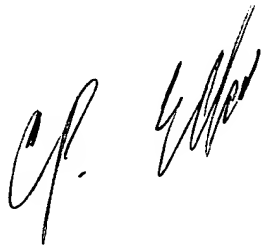

Patent Number 5,402,895 by Mikkelsen et al.
